JQUERY METHODS:

\$('#heading').html('Your Name');
\$('.main').find('h1').addClass('warning');

SELECTORS:

<pre>\$('.className')</pre>	class selector
\$('.#idName')	id selector
\$('h1, h2, h3')	multiple selectors
\$('li a')	descendent selector

EVENTS:

\$('li').on('click', function() {
 // Code to execute goes here
});

\$('h1 > a')	direct child selector
\$('h1 + a')	adjacent sibling selector
\$('h1 ~ a')	general sibling selector

FINDING ELEMENTS

\$('p').find('a');	find descendents
\$('p').children('a');	find children

<pre>\$('p').parent('div');</pre>	find parent
<pre>\$('p').siblings('a');</pre>	find siblings

GETTING/SETTING CONTENT

```
$('p').html('Hello');
$('img').attr('src', 'images/fun.png');
$('.alert').css('color', '#00FF00');
```

<pre>\$('p').addClass('success');</pre>
<pre>\$('p').removeClass('error')</pre>

EFFECTS/ANIMATION

```
$('p').show(300);
$('p').hide(500);
$('div').fadeIn('slow');
$('h2 a').fadeOut('fast')
```

\$('p').slideUp(350); \$('p').slideDown(600); \$('h1').slideToggle(300);

DEBUGGING

```
console.log('hello');
console.log($('h2'));
```

alert('Message to pop up')
